

Our full suite of services includes:

Millwright

- » Installing
- » Setting
- » Aligning
- » Leveling
- » Dismantling
- » Refurbishing
- » Reassembling
- » Moving

Plant Relocation

- » Planning and budgeting
- » Project management and scheduling
- » Logistics management and coordination
- » Performance of all work at the source and receiving plants

Fabrication

- » Welding
- » Structural steel
- » HVAC ducts

Automation

- » Automatic guided vehicles (AGVs) and self-driving vehicles (SDVs)
- » Industry 4.0, including controls, interfaces, programming, and robotics

Industrial HVAC Services

- » Scheduled preventive maintenance
- » Diagnostics
- » Corrective maintenance/repairs
- » Renovation projects
- » Equipment upgrades
- » Plant maintenance

A Comprehensive Suite of Millwright, Mechanical, and Robotics Services

Since 1993, Cherokee Millwright has been providing top-notch millwright, mechanical, and robotics services to clients across Tennessee and Kentucky. Our company was founded to fulfill the growing need for a full-service millwright company that treats customers like family and equipment with care. At Cherokee, customer satisfaction is the top priority, and an experienced team of experts provides the highest quality service.

End-to-End Precision Millwright Services

Whether bringing in new equipment, moving machinery within a building, or relocating an entire plant to a new facility hundreds of miles away, we can handle virtually every millwright challenge from installation, setting, and alignment to dismantling, refurbishing, and reassembly. We are also highly experienced in close tolerance and precision alignment for both relocation and integration projects.

Turnkey Automation Featuring Cutting-Edge Technology

From warehouse management systems to electrical controls to automatic-guided vehicles (AGVs) and self-driving vehicles (SDVs), we offer custom, turnkey automation services, with end-to-end design, installation, programming, mapping, maintenance, and support capabilities.

Fabrication Solutions from Professional Welders

Either working on-site or from our 34,000-square-foot shop, Cherokee's team of welders provides top-notch fabrication solutions. We fabricate stainless steel, carbon, galvanized, aluminum, and copper and also have the capabilities to handle structural steel, sheet metal, and even add-ons like mezzanines.

Industrial HVAC Expertise

Cherokee has HVAC expertise in industrial facilities, distribution centers, manufacturing facilities, and more. Offering service, maintenance, and full-scale HVAC retrofits, our technicians have the right tools, instrumentation, and experience to service and repair nearly every type of industrial HVAC equipment.

Keeping Advanced Equipment Maintained and Running Smoothly

After relocating a plant or installing new machinery, we offer plant maintenance services that help ensure equipment runs efficiently and effectively over the long-term. Whether for custom maintenance plans or as-needed support, we can service your most important assets, from presses to injection-molds to automation equipment and more.
